Step 2: Create a new repository. A repository is like a place or a container where something is stored; in this case we're creating a Git repository to store code. To create a new repository, select New Repository from the + sign dropdown menu (you can see I've selected it in the upper-right corner in the image above).

A step-by-step guide to Git | Opensource.com

Step #3: Competitor analysis. By now you have probably heard the saying that “content is king.” In theory, the more content you have, the more keywords you will have on your site and the higher the chance that you’ll rank on Google for more terms. Of course, the content needs to be of high quality and people have to be interested in that topic.
