The Guessing Game is a classic programming exercise that challenges a programmer ability to use branches, functions and loops. The game starts off with the program generating a random number between 1 and 10. The player then needs to guess the random number while the algorithm will tell the player if the number is higher or lower.

See encoding declarations in the Python Reference Manual. If a comment in the first or second line of the Python script matches the regular expression coding[=|:]s*([!-w,]+), this comment is processed as an encoding declaration; the first group of this expression names the encoding of the source code file. (Emphasis mine) So yes, it is a comment, a special one.
